PERSONAL SUMMARY

M.Sc. Computer Science student at Universität Konstanz with hands-on experience through academic and personal projects in backend, mobile, and machine learning applications. Interested in data-driven and analytical roles, with a strong willingness to learn and quickly adapt to new technologies and domains.

EDUCATION

Universität Konstanz <i>M.Sc. in Computer and Information Science</i>	Oct. 2025 – Expected 2027 <i>Konstanz, Baden-Württemberg</i>
Istinye University <i>B.Sc. in Computer Engineering</i> GPA: 2.2 (German scale)	Oct. 2021 – July 2025 <i>Istanbul, Turkey</i>
42 Istanbul – Piscine Program <i>Intensive 4-week program in C, algorithms, and UNIX systems</i>	Aug 2022 – Sep 2022 <i>Istanbul, Turkey</i>

EXPERIENCE

Mobile App Development Intern <i>Ulusol Faktoring (BDDK-regulated financial institution)</i> * Contributed to the development of a production-level fintech mobile application using Flutter and BLoC architecture * Designed and implemented secure authentication and transaction-related features backed by Firebase services * Optimized state management and application structure to improve maintainability and scalability * Collaborated in a remote Agile team, participating in sprint planning, code reviews, and version control using Git	Jul 2024 – Aug 2024 <i>Remote</i>
---	--------------------------------------

PROJECTS

Vulnerable Group Detection <i>Python, OpenCV, YOLOv5, PyTorch</i> * Built a computer vision system to detect vulnerable pedestrians(e.g. wheelchair users) in traffic environments * Fine-tuned a YOLOv5 model for real-time object detection on video streams * Processed and analyzed traffic footage using OpenCV and evaluated detection performance under varying conditions	
OweMate <i>Flutter, Dart, Firebase</i> * Developed a mobile application for tracking shared expenses and managing debt records * Implemented Firebase Authentication and Firestore for secure user management and data synchronization * Designed state management and structured UI components for scalable feature extension	
CleanTrack <i>React, Spring Boot, MongoDB, REST API</i> * Developed a full-stack cleaning management system for task tracking and resource coordination * Designed and implemented RESTful APIs using Spring Boot for client-server communication * Integrated MongoDB for scalable NoSQL data storage and efficient querying * Structured backend using layered architecture (controller, service, repository pattern)	

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, HTML/CSS, SQL (Postgres), Dart
Frameworks: Spring Boot, React, Flutter, REST APIs, MongoDB, PostgreSQL, Firebase, OpenCV, PyTorch
Libraries: pandas, NumPy, Matplotlib

LANGUAGES

Turkish (Native)	English (Fluent, IELTS 7.5 – C1)	German (A2)
